

Tribes and their family names (1 of 4)

the tribe's ground as the 1853, 1881 and Martel sheets place it (ellipse and label markers), every 2024 registered voter bearing its nisba (dots), and the three largest concentrations beyond 25 km (arrows). Each panel carries its own dot value, so panels show geography and do not compare counts.

A nisba is a name, not a membership. The ground is the largest ellipse the sheets support, bounded by neighbouring names (MapsTN); dashed where the sheets disagree. Dots fall at random inside their imada. Counts: ISIE register, 6 July 2024. Boundaries: OCHA COD-AB admin4.
