

From the tribe's ground to the name's centre of gravity

43 tribes the nineteenth-century sheets place, each paired with the family name derived from it in the 2024 voter register

Each arrow starts at the centre of the tribe's ground (the pale ellipses, as MapsTN reads the 1853, 1881 and Martel sheets) and ends at the voter-weighted centre of gravity of the name in 2024. Width follows the number of voters bearing the name.

colour: share of the name registered inside its ground

- 40% or more registered inside the ground
- 15 to 40%
- under 15%

furthest moved centres

- Troud → Troudi: 413 km NE, 0% inside
- Matmata → Matmati: 333 km N, 1% inside
- Ouerghemma → Werghemmi: 264 km N, 4% inside
- Hamarna → Hamrouni: 252 km N, 1% inside
- Beni Mezzeline → Mezlini: 218 km E, 0% inside
- Nefzaoua → Nefzaoui: 210 km NE, 2% inside

most still inside the ground

- Ouled Sdira → Sdiri: 41% inside, 122 km E
- Riah → Riahi: 27% inside, 40 km E
- Hakim → Hkimi: 18% inside, 102 km E
- Beni Zid → Zidi: 12% inside, 190 km N
- Ouled bou Salem → Boussalmi: 12% inside, 66 km E
- Zouagha → Zouaghi: 11% inside, 75 km E

A centre of gravity is a mean, so a name split between its ground and Tunis has its centre on the road between them where nobody lives. The arrow is a summary of a distribution, not a route, and a nisba is a name, not a membership. Grounds: MapsTN tribal_spread.csv; counts: ISIE register, 6 July 2024; boundaries: OCHA COD-AB.
