

How much of each tribe's name is still registered on its nineteenth-century ground

43 tribes placed by the 1853, 1881 and Martel sheets, each paired with its nisba in the 2024 register, sorted by the share inside. The ground is the largest ellipse the sheets support, so a tribe hemmed in by neighbouring names has a small ground and reads as dispersed; a tribe alone in its quarter has a large one and reads as settled.

A nisba is a name, not a membership. Grounds: MapsTN tribal_spread.csv. Counts: ISIE register, 6 July 2024, domestic voters with a resolved imada.
