

The six most concentrated family names, on one map

the names whose holders sit in the fewest places: highest Herfindahl index over imadas among those with at least 3,000 holders worldwide — the count on each line is the part of them the map can place

- **Akrimi** عكريني
2,990 voters · 323 imadas
 - **Mattoussi** الماطوسي
3,056 voters · 324 imadas
 - **Hakki** حقي
3,206 voters · 321 imadas
 - **Guermazi** قرمازي
3,069 voters · 259 imadas
 - **Dhifaoui** ضيفاوي
3,114 voters · 333 imadas
 - **Ragoubi** راقوبي
2,991 voters · 190 imadas
- 1 dot = 2 voters

Six rather than seven: exhaustively searched over five published qualitative palettes, the best six colours stay 16.1 CIEDE2000 apart under normal vision and all three dichromacies, where the best seven fall to 13.0.

Each of these six owns a district, and together they cover little of the country — the opposite of the commonest names, which are in `overlay_common_names`. Concentration is where a name is registered in 2024, not proof its holders never moved.

Dots fall at random inside the imada that holds them: the count per imada is data, the position within it is not. Counts: ISIE preliminary voter register, 6 July 2024.
Boundaries: OCHA COD-AB admin4.
