

Zouhair Maghzaoui — margin over his strongest rival

governorate level · 24 units
own share minus the strongest rival's

percentage points (negative: behind the leader)

24 mapped units

Maghzaoui is third in every unit at this level, so this is his deficit to Saied, not to Zammel.
Darker is a better result for this candidate. The scale is fixed at the full -100 to +100 points a margin can take, so a shade means the same margin on every figure here; the bracket on the bar shows the range these units actually occupy, and the number on each unit is its own margin.
