

4 names, 4 clusters

the most spatially concentrated family names
in the 2024 register, each in its own colour,
on one map

- Akrimi

عكريني

2,990 voters · 323 imadas · Sidi Bou Zid
 - Mattoussi

الماطوسي

3,056 voters · 324 imadas · Béja
 - Hakki

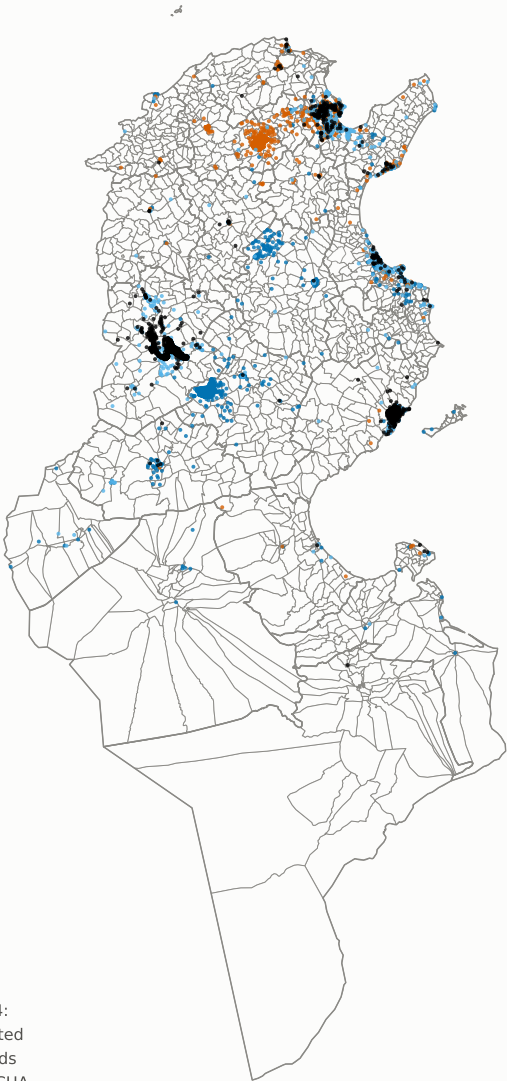

حقي

3,206 voters · 321 imadas · Kassérine
 - Guermazi

قرمازي

3,069 voters · 259 imadas · Kassérine
- 1 dot = 2 voters

Colours are four of the eight Okabe-Ito hues, a palette
built to stay separable under red-green and blue-yellow
colour blindness; tools/check_dot_palette.py asserts that
it does, on these four and against this ground.

Where a name is concentrated is where its holders are registered in 2024:
a family that stayed, one that was resettled together and one that migrated
together all look alike here. Dots fall at random inside the imada that holds
them. Counts: ISIE preliminary voter register, 6 July 2024. Boundaries: OCHA
COD-AB admin4.
