

Turnout

delegation level · national rate 30.38%

259 mapped units

Classes break on the national rate, 30.38%, so the boundary between light and dark is a real number rather than a quantile: 105 units fall below it and 154 above. Observed range 13.8% to 44.8%.
5 unit(s) are drawn grey because their turnout would rest on under 50% of their stations — see the coverage map beside this one.
The registered count is the only field in this dataset that no identity on the form checks — the one field read by classifier alone — so turnout is a certified numerator over an uncertified denominator, and is weaker evidence than any candidate figure mapped elsewhere in this directory.
