The sheets disagree on where this tribe was; the
ground drawn (dashed) joins their placements and
covers Oulad Amer.

A nisba is a name, not a membership: not every holder descends from the tribe, and the register cannot say which do. The ground is the largest ellipse the sheets support, bounded by neighbouring names, not a boundary anyone drew (MapsTN, tribal_spread.csv). Dots fall at random inside the imada that holds them. Counts: ISIE register, 6 July 2024; boundaries: OCHA COD-AB admin4.
