

Turnout

imada level · national rate 30.37%

1967 mapped units

Classes break on the national rate, 30.37%, so the boundary between light and dark is a real number rather than a quantile: 845 units fall below it and 1122 above. Observed range 5.4% to 84.1%.

75 unit(s) are drawn grey because their turnout would rest on under 50% of their stations — see the coverage map beside this one.

The registered count is the only field in this dataset that no identity on the form checks — the one field read by classifier alone — so turnout is a certified numerator over an uncertified denominator, and is weaker evidence than any candidate figure mapped elsewhere in this directory.
