

Zouhair Maghzaoui

kernel-smoothed surface · vote-weighted
fixed bandwidth · 10 km

2024 Tunisian presidential election · each imada centroid is a sample, weighted by its certified valid votes.
The bandwidth is a fixed 10 km, the same everywhere — published for comparison with the local-bandwidth maps.
Cross-validation prefers those: 2.718 pp weighted MAE against 3.548 pp at 10 km.
Grey: the nearest place that voted is more than 30 km away, so no estimate is drawn. Boundaries: OCHA/HDX COD-AB (CC BY-IGO).
Class breaks are the imada quantiles, as in the choropleths.
