

Jendouba governorate · against each candidate's own average

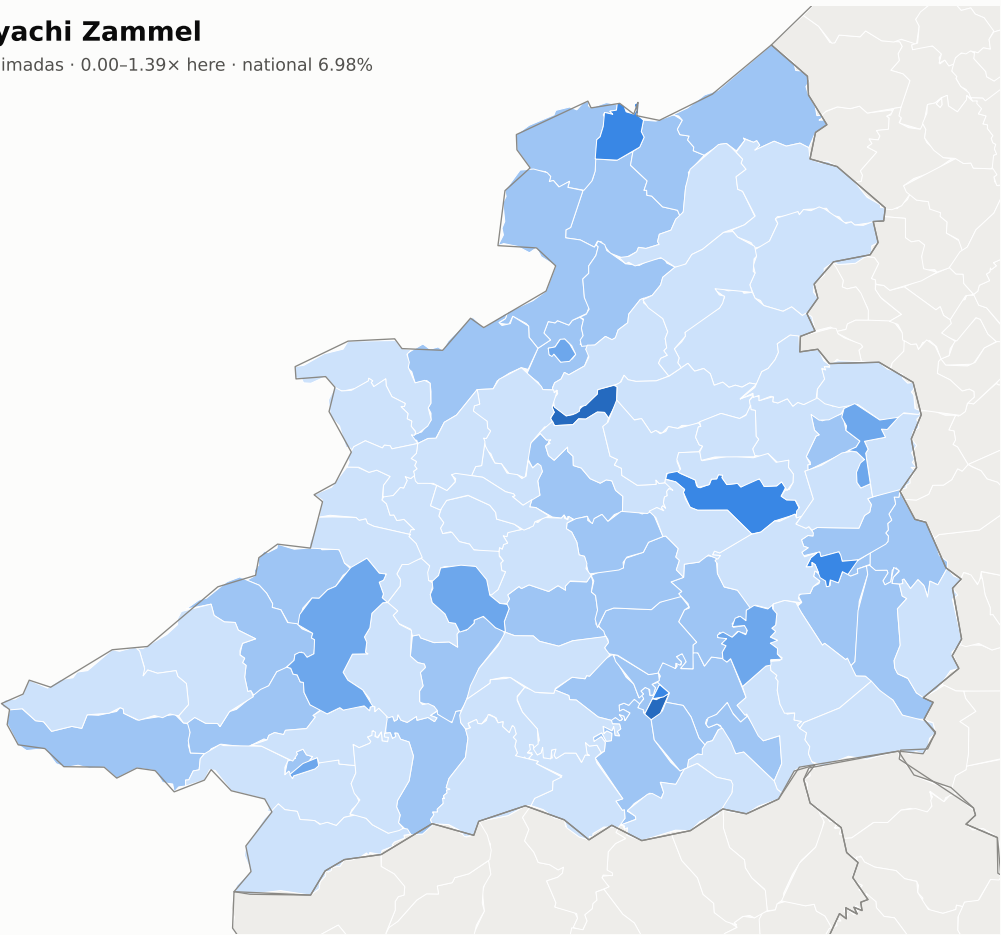

local share ÷ this candidate's national share — one scale for all three panels

under 0.25× 0.25 – 0.5× 0.5 – 0.71× 0.71 – 1.00× 1.00 – 1.41× 1.41 – 2.0× over 2.0× no result

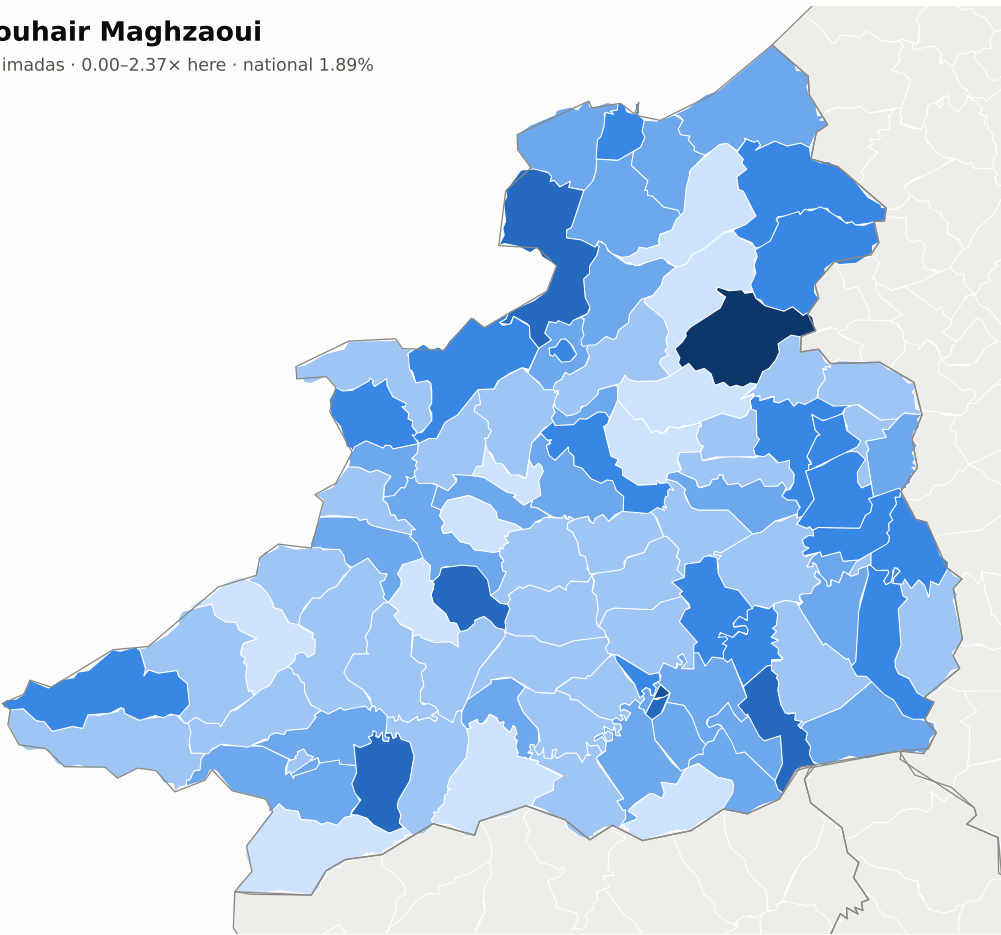

Kais Saied
95 imadas · 0.97–1.10× here · national 91.12%

Ayachi Zammel
95 imadas · 0.00–1.39× here · national 6.98%

Zouhair Maghzaoui
95 imadas · 0.00–2.37× here · national 1.89%

ONE shared scale, and it is national — so this basis is comparable on BOTH axes at once: across the three panels, because a shade means the same multiple of that candidate's own national share with the boundary at 1.00× being that average; and across all 25 sheets, because the scale does not depend on the extent. The shares basis is comparable only across sheets, its breaks being each candidate's own quantiles. Saied is nearly flat because he cannot exceed 1.10×: at a 91.12% national share, a unit giving him 100% is only 1.10 times it. Neighbouring imadas are drawn in light grey for orientation and carry no value. 2024 Tunisian presidential election · shares of valid votes at certified stations · imada level · boundaries OCHA/HDX COD-AB (CC BY-IGO)
