

Saied's margin over his strongest rival

kernel-smoothed surface · vote-weighted
local bandwidth · nearest neighbour

percentage points

no imada within 30 km

2024 Tunisian presidential election · each imada centroid is a sample, weighted by its certified valid votes.
The bandwidth is local: every sample is smoothed over its own nearest-neighbour distance (median 4.2 km, max 105 km), chosen by leave-one-out cross-validation.
Grey: the nearest place that voted is more than 30 km away, so no estimate is drawn. Boundaries: OCHA/HDX COD-AB (CC BY-IGO).
THE SCALE IS FITTED TO THIS SURFACE: the ramp spans 26.2 to 97.6, not the full -100 to 100, which is about 2.8 times the contrast of the fixed-scale version. The price is that a shade means nothing on any other figure; the strip beside the bar shows the window. For a comparable shade use [maps/surfaces/margin_kde.*](#)
