

Turnout — Tunis governorate

THE SCALE IS FITTED TO THIS EXTENT: the ramp spans only the turnout these imadas hold, so the whole of it goes on the variation inside this map — which is what this family was originally built to do, restored as a continuous scale.

The price is that a shade means nothing outside this map. The strip beside the bar shows the window against the full 0–100, the subtitle gives the range, and maps/turnout/micro_turnout_<extent>.* is the comparable one.

The registered count is the only field in this dataset that no identity on the form checks — the one field read by classifier alone — so turnout is a certified numerator over an uncertified denominator, and is weaker evidence than any candidate figure mapped elsewhere in this directory.

Neighbouring imadas are drawn in light grey for orientation and carry no value. Source: ISIE procès-verbaux · boundaries OCHA/HDX COD-AB (CC BY-IGO) · turnout is voters over registered, on the stations where both figures survived the read
