Saïed's margin over his strongest rival

95 imadas · 78.7–100.0% here

The scale is the fixed one — 0–100% for a share, –100 to +100 points for the margin — identical on every sheet and on every other figure in this repository, so a shade means the same value here as anywhere else. Each panel's subtitle gives this extent's own range, and the bracket on each bar shows it against the full scale.

Neighbouring imadas are drawn in light grey for orientation and carry no value. 2024 Tunisian presidential election · shares of valid votes at certified stations · imada level
