

# Ayachi Zammel — Tunis governorate

THE SCALE IS FITTED TO THIS EXTENT: the ramp spans only the values these imadas hold, so the whole of it goes on the variation inside this map. This is what the family was originally built to do — it classed on the extent's own quantiles — restored as a continuous scale.

The price is that a shade means nothing outside this map. The strip beside the bar shows the window against the full 0–100, the subtitle gives the range, and maps/micro/micro\_<extent>\_<candidate>.\* is the same map on the fixed scale for when comparability is what you need.

Neighbouring imadas are drawn in light grey for orientation and carry no value. 2024 Tunisian presidential election · shares of valid votes at certified stations · imada level · boundaries OCHA/HDX COD-AB (CC BY-IGO)
