

Ayachi Zammel — Tunis governorate

One candidate, one extent, at full page size. The scale is the same fixed 0–100% one every share figure here uses, so a shade means the same value as on any other map; the bracket on the bar and the subtitle both give this extent's own range.

On that scale one candidate over one governorate is close to flat, so this version buys comparability rather than detail. For the detail — the whole ramp spent on this extent, which is what the family was built to do — use maps/fitted/micro_<extent>_<candidate>.* Neighbouring imadas are drawn in light grey for orientation and carry no value. 2024 Tunisian presidential election · shares of valid votes at certified stations · imada level · boundaries OCHA/HDX COD-AB (CC BY-IGO)
