

Turnout — Ben Arous governorate

Breaks are LOCAL — quantiles of turnout among the imadas of this extent alone — so the whole ramp goes on the variation inside it and a shade means nothing outside this map. Use the national sheets to compare extents; use this to see inside one.

The registered count is the only field in this dataset that no identity on the form checks — the one field read by classifier alone — so turnout is a certified numerator over an uncertified denominator, and is weaker evidence than any candidate figure mapped elsewhere in this directory.

Neighbouring imadas are drawn in light grey for orientation and carry no value. Source: ISIE procès-verbaux · boundaries OCHA/HDX COD-AB (CC BY-IGO) · turnout is voters over registered, on the stations where both figures survived the read
