

Registered electorate

imada level

registered voters (matched basis)

2042 mapped units

The electorate itself, summed over the same matched stations the turnout ratio uses, so the two maps rest on one basis. 0 unit(s) have none.

The registered count is the only field in this dataset that no identity on the form checks — the one field read by classifier alone — so turnout is a certified numerator over an uncertified denominator, and is weaker evidence than any candidate figure mapped elsewhere in this directory.
